

**Please add the following new Abstract of the Disclosure:**

**Abstract:** A cover (10) for substrate (not shown) including: a body (12) defining a cavity (18), for positioning over the substrate (not shown) to form a reaction chamber (18); and a projection (13) extending from the body (12) to define a fluid reservoir (14), when the cover (10) is fitted to the substrate (not shown), the fluid reservoir (14) being in fluid communication with the cavity (18).
